BRAHMS KONTOR Hamburg

BRAHMS KONTOR

BRAHMS KONTOR is an impressive mix of classic and modern, as well as history and stories, in the centre of Hamburg. Built in several phases between 1904 and 1931, it is the most striking building between the traditional Planten un Blomen park, the Laeizhalle and the city centre. Each floor of the building is a journey of discovery through time.

Most notably, 1920s design is combined with the style of our time across more than 550 m² of event space. Here, you will encounter art déco, high-quality modern interior design and impressive lighting. The event area has four listed rooms: PRELUDE, INTERMEZZO, SYMPHONIE and SONATE. In the latter, there is also the Rachals wing from the year 1904, which has been restored for the building – performing there is expressly permitted.

The listed rooms are accompanied by a modern event area of about 180 m², which can be used in a variety of ways thanks to a flexible partitioning system, equipped with modern video and conference technical equipment which includes integrated LCD monitors and retractable projection screens.

BRAHMS KONTOR is the ideal venue for meetings, conferences and presentations, as well as for festive dinners and exclusive cultural events in a unique, versatile atmosphere in the heart of the Hanseatic city.
